

Agroforesterie Formation en Europe 2013-1-FR1-LEO05-48937

Project Aim

The aim of the AgroFE project is to play an important role in Agro-forestry trainings. Depending on the European countries, states or professional organizations and training actors try to reintroduce Agro forestry in the course of training and qualification in initial training and in adult education. The main objectives are to make a synthesis of needs and expectations, based on present the existing training actions and to set up a common framework; to build an innovative training system (contextualized, modularized trainings, use of ICT, professionals participation); to create a technical collaborative support for the implementation of the project with communication tools (information of partners and promotion) and for providing access to the resources and training services during and after the project (knowledge databank, interactive services). The system architecture is based on open source concept using Search Engine (harvester), Digital Asses Management System (KDB), Content Management System for internet portal, Editorial Chain (workflow) Management, E-Learning platform.

Main ICT Objectives

The objectives are to make a synthesis of needs and expectations, based on the present existing training actions and to set up a common framework; to build an innovative training system (contextualized, modularized trainings, use of ICT, professionals participation); to create a technical collaborative support for the implementation of the project with communication tools (information of partners and promotion) and for providing access to the resources and training services during and after the project (knowledge databank, interactive services). To achieve this objectives the following main activities have to be carried out:

- Exploitation of the tools and services.
- Building a collaborative working environment.
- Planning the architecture for development, teaching and training.
- Implementing the e-learning environment.
- Designing the multimedia tools to make the system accessible for learners, trainers.

Agroforesterie Formation en Europe 2013-1-FR1-LEO05-48937

PROGRAMME of WORKSHOP

Objectives: Discussing of the achieved results of the project, testing the ICT tools and system, discuss the educational content, materials, curricula.

Thursday 13 November 2014

14⁰⁰ – 16⁰⁰ Speakers Presentations. Discussion round. Language (English / Hungarian)

16⁰⁰ – 16³⁰ Coffe Break

16³⁰ -18⁰⁰ Speakers Presentations. Discussion round. Language (English / Hungarian)

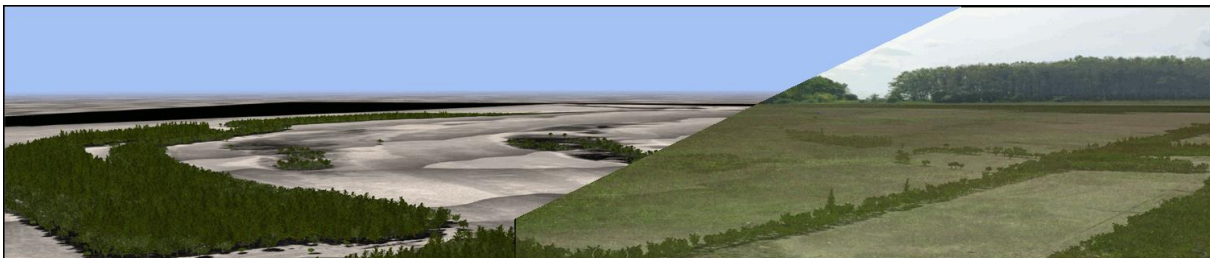

Saturday 15 November 2014

9⁰⁰ – 12³⁰ Joint Field Excursion of AgroFE and CHANGEHABITAT2 Site: Ágotapuszta Natura 2000 Site- FOREST RESEARCH INSTITUTE (ERTI)

<http://www.erti.hu/en/arboretums/puspökladány>

12³⁰ Lunch

Departure at 8:00 from Agricultural CAMPUS (roundabout)

Programme of Field Excursion:

NATURA2000 habitat mapping of agroforestry and salty grassland - MobilGIS technology in practice (local organizer Forestry Committee and Water Management Committee of Hungarian Academy, Debrecen).
